# Draft-ietf-ippm-metrictest-03

Clarifications and lessons learned → Ready for WGLC?

Lessons learned from testing (see Al's testplan-rfc2679 slides):

- ❖ The two site test set up was successfully tested and is now part of the core text
- ❖ Now we RECOMMEND to include an impairment generator in the test set up.

Other changes

- ❖ Replaced text demanding 5 (or more) tests by text on statistical methodology used to avoid random results (key words are “degree of freedom or students T-Test”).
