

Update on NHDP MIB draft

Ulrich Herberg
Robert Cole
Ian Chakeres

Update on draft-ietf-manet-nhdp-mib-08

- WG LC finished, got comments from Justin Dean
- Cleaned editorial issues, particular with respect to ambiguities when using multiple addresses / multiple interfaces
- Added back the nhdpLibLocalIfSetTable holding local address assignments to interfaces
- Changed some counters to 64 bit, to avoid wrap-arounds too soon
- Corrected some of the performance related objects

Next Steps for draft-ietf-manet-nhdp-mib

- Include new review from Justin in -08
- WG LC
