

W3C webrtc chairs report

Stefan Håkansson
Harald Alvestrand

Status

- First face to face WG meeting arranged Saturday
- ~35 people, active engagement
- Architecture: Shared with RTCWEB
- Use cases: ditto (a couple of additional ones proposed)
- Requirements: API requirements extracted into W3C doc
- API Design: API mapping into protocols clearly important
- User permission for device usage important, not clear
- Implementation status: you will hear soon...

Next steps

- Provide feedback to RTCWEB work (on mailing list)
- Update and refine requirements document
 - In tandem with IETF use case document update
- Create a W3C WG document with the API proposal
 - and of course appoint editors for it
-
