Status of SCTP IDs

Randall Stewart (rrs@lakerest.net)

Michael Tüxen (tuexen@fh-muenster.de)

draft-ietf-tsvwg-sctp-strrst-11.txt

- All comments received during the WG LC have been addressed:
  - Substantial changes on naming and consistency.
  - Added support for adding incoming streams.
  - Improvement of socket API.
  - Language improvements.
- No one came up with a pure in-band solution.
- One open comment on the list.

draft-ietf-tsvwg-sctp-udp-encaps-00.txt

- Completely rewritten.
- Describes
  - Usage scenarios
  - Limitations
  - Encapsulation and De-capsulation procedure
- Based on experience in the BSD implementation.
- Authors think the contents is complete, but the document needs review and comments.

draft-ietf-tsvwg-natsupp-01.txt

- A thesis identified issues:
  - Unspecified behavior
  - Corner cases not appropriately covered
- These will be addressed in the next revision.
- Dependency to a WG document in BEHAVE.
