

# draft-ietf-behave-lsn-requirements-04

Presenter: Shin Miyakawa

IETF 82, Taipei

2011-11-17

# Status

- WGLC done
- Received reviews
- Need to fix a few things, nothing major.
- Will fix as soon as draft submission reopens, then send to IESG.

# Issue 1: IPR declaration

- <https://datatracker.ietf.org/ipr/1648/>
- Question to the WG: do we need to do anything about this?
  - Do nothing
  - Trash whole document
  - Remove text covered by IPR
  - ?

# Issue 2: Informational sections

- Sections “Logging” and “Bulk Port Allocation” are non-normative.
- Consensus from Prague and Québec was to keep them non-normative.
- However, much discussion on the list about this.
  - No consensus.
- What to do?
