NAT logging

draft-sivakumar-behave-nat-logging-03

Senthil Sivakumar (ssenthil@cisco.com)
Reinaldo Penno (rpenno@juniper.net)
NAT logging

• Is required for legal requirements, traceability and data retention

• This draft defines
  – formats for NAT/NAT64 event logging
NAT Logging - 2

• Ability to write applications to collect the data and process in a generic way
• Vendor agnostic
• Draft does NOT specify the transport protocol to be used to carry the data
Changes in Version -03

- Destination logging optional
- Added IANA registry requirements
- Incorporated other comments
Open questions

• DSCP bits to be logged?
  – DSCP can be used as a multiplexer

• Should we specify transport protocol?
Next steps

• Adopt as WG item?
