The Future of DANE?

Post dane-protocol work
Operational Draft?

- Protocol doc has a operational section
- Do we need one?
  - If yes, any volunteers?
What else?

- IPSec (it’s in the charter)
- S/MIME (non-WG I-D Exists)
- Bare keys (OOB Pubkey in TLS)
- Update DANE from TLS WG?
Go into hiatus?
AOB?
