

KARP OPERATIONS MODEL

SAM HARTMAN

PAINLESS SECURITY, LLC

IETF 82

NOVEMBER 16, 2011.

CURRENT STATUS

- Minor readability improvements
- Addressed comments received so far
- Too many questions, not enough answers

OPS MODEL AND CRYPTO TABLE

- Section 3.1 and 3.2 discuss interactions with the key table
- Additional questions from attempts to use for OSPF and for automated key management
- Discussions required with key table authors to update based on attempts to use

OPERATOR DISCUSSIONS

- Discussion of upgrade and new hardware deployment
- Many interactions with security mechanisms and availability
- Need to understand what operators do in this space and what is acceptable

VENDOR MANAGEMENT ISSUES

- Questions about mandatory to implement for management
- Need to review and discuss with vendors particularly CLI and configuration schema folks
