

# Draft-ietf-kitten-sasl-openid

Eliot, Hank, Hannes, Simon

# What has happened since Quebec City

- Lots of comments
  - AD review
  - Security Area review
  - others

# Results

- Better consistency of language
- Consistent requirement for TLS
- Clarification on the use of transaction ids
- Simplify the security considerations section
- Remove Future Work (it just confused everyone)
- Improve text on use of GS2
- Correct terminology (signature v. MAC)
- On-the-wire intent not changed.

# Next Steps

- New version containing these changes will be released after this meeting
- Please comment soon if any of the changes concern you
- On the IESG telechat agenda for December
