

Consolidating mile-iodef-xmlreg and mile-template

because one document is better than two

Brian Trammell (as contributor)
IETF 82, Taipei, 16 November 2011

draft-trammell-mile-iodef-xmlreg

- Under consideration as a WG item.
- "Changes to the XML Schema registry for schema names beginning with "urn:ietf:params:xml:schema:iodef" are subject to an additional IODEF Expert Review [RFC5226]. The IODEF expert(s) for these reviews will be designated by the IETF Security Area Directors."
- Minus boilerplate, *that's the whole document*.
- Intended to require review of IODEF extensions for compliance with 5070 and other MILE WG work.
- Already (informally) cleared with IANA.

Proposal: add to mile-template

- Add -iodef-xmlreg to -mile-template IANA Considerations section
 - Per a mailing list suggestion by David Black.
- Issue: document intended status
 - -mile-template is currently Informational
 - changes to IANA registries require a Standards Action...
 - ...but the registry itself is defined by a BCP (81 / RFC 3688)
