Network State Migration
draft-gu-opsawg-policies-migration

Yingjie Gu
Scope

• Network State Migration
  – At the first stage, we will focus on migrating the session table on Firewall.
  – The scenarios include Network State Migration
    • between DCs, with acceptable distance
    • within the same DC
Analyze the problem

Communication for State Migration
- Firewall Capability
- VM Identifier
- Source Firewall Identifier
- Destination Firewall Identifier
- State Transfer

API for notification of VM Migration event
- VM Identifier
- Source VM location
- Destination VM location
- VM migration status
