Note Well

- Any submission to the IETF intended by the Contributor for publication as all or part of an IETF Internet-Draft or RFC and any statement made within the context of an IETF activity is considered an "IETF Contribution". Such statements include oral statements in IETF sessions, as well as written and electronic communications made at any time or place, which are addressed to:
  - the IETF plenary session,
  - any IETF working group or portion thereof,
  - the IESG, or any member thereof on behalf of the IESG,
  - the IAB or any member thereof on behalf of the IAB,
  - any IETF mailing list, including the IETF list itself, any working group or design team list, or any other list functioning under IETF auspices,
  - the RFC Editor or the Internet-Drafts function

- All IETF Contributions are subject to the rules of RFC 5378 and RFC 3979 (updated by RFC 4879).

- Statements made outside of an IETF session, mailing list or other function, that are clearly not intended to be input to an IETF activity, group or function, are not IETF Contributions in the context of this notice. Please consult RFC 5378 and RFC 3979 for details. Please consult RFC 3978 (and RFC 4748) for details.

- A participant in any IETF activity is deemed to accept all IETF rules of process, as documented in Best Current Practices RFCs and IESG Statements.

- A participant in any IETF activity acknowledges that written, audio be made and may be available to the public.

Administrative Tasks

- Blue Sheets
- Note Takers
- Emergency Backup Note Taker
- Jabber Scribe

Agenda

Tuesday, November 15, 2011; 1710 – 1810

Time	Length	Presenter	Topic
1710 - 1725	15min	Chairs	Agenda and Status
1725 - 1810	45 min	Christer Holmberg	Charter item: Requirements for a mechanism to indicate proxy capabilities

Drafts in RFC Editor Queue

- event-rate-control: In AUTH48 period, will be published as RFC 6446. Experiencing slight publication delay due to terminology mismatch with draft-ietf-geopriv-loc-filters (max-rate versus min-interval).

- location-conveyance: In "RFC-EDITOR" state since October 14. Expected to enter AUTH48 in the next few days.

Other Charter Item Status

- <u>RFC 3265bis</u>: Open items closed, WGLC complete. Will pubreq in the upcoming weeks.

- <u>RFC 4244bis</u>:
  - New -06 version of the document, addressing (second) WGLC comments. Incorporates call flows for voicemail handling.
  - New version of callflows companion document. Will be calling for adoption on list to progress as WG item under 4244bis charter item.

Websockets as a SIP Transport

- draft-ibc-rtcweb-sip-websocket proposes adding "WS" (websockets) as a new SIP transport (in addition to "UDP" and "TCP").

- See discussion on RTCWEB mailing list from September 13 through 16.

- New SIP transports are core protocol changes, and would fall within the SIPCORE charter.

- Go read the draft and comment on the SIPCORE list. If we see enough interest *and energy,* we'll call for consensus around adoption.
