

RFC 3315 Update

Ted Lemon
Nominum, Inc.

Motivation

- RFC3315, 3633 and 3736 contain a lot of nearly duplicate text
- Some errata are the result of this duplication
- Let's merge the three documents and eliminate the duplication
- RFC3315 omitted support for configuration of multiple provisioning domains
- This lack has been cited as a reason not to use DHCPv6, and to prefer RA/SLAAC
- For sites that need DHCP rather than SLAAC, let's have feature parity

Next Steps

- I'm volunteering to do a careful merge of the three documents
- Need a lot of review following merge
- Need to adopt as a working group item
- Need help
- Discuss on mailing list
