Voice – TDM	E2U+PSTN:Tel plus Tel URI

<b>Message</b>	<b>Parameters (delegation illustration)</b>
Query:	E.164 number
Query result:	NameServer Address

# Interfacing with registries

- Data available for registries:
  - NAPTR data,
  - NS data,
  - URI data.
- What plans for using option tags and standardisation of tags?
- What other ENUM services than TEL and SIP are expected?
- Status of the interface for registry provisioning?
