

# Update on NHDP MIB draft

Ulrich Herberg  
Robert Cole  
Ian Chakeres

## Update on draft-ietf-manet-nhdp-mib-12

- Got detailed (and very helpful!) review from Adrian
- Submitted revised draft on March 26

## Changes were:

- Added recommended values for initial wait time before sending notifications (3x HELLO\_INTERVAL)
- Added recommended values for thresholds / window size for sending notifications
- Many editorial issues
- Removed references from MIB-module
- Changed MAX-ACCESS from read-write to read-create for NhdpInterfaceEntry elements

## Changes were:

- Changed nhdpUpTime and nhdpIfStateUpTime from TimeTicks to TimeStamp (time at which interface has been brought up)
- Added DEFVALs for ChangeWindow and ChangeThreshold objects
- Changed nhdpIfState from INTEGER(down, up, addresschange) to TruthValue (for down and up)
- Added OBJECT definitions in Compliance Statement
- Removed nhdpSetNotification bit map from notifications control (not contained in any other MIB module besides OSPF-MIB)
