Media Latching
draft-kaplan-mmusic-latching

• Documents Media Latching
  – Informational
  – Meant to provide a ref for latching (and HNT)

• Documentcommon practice

• Please review!
Signalling

• Latching: Not a SIP exclusive
  – XEP-0177
  – A SIP and XMPP example
Security Considerations

• Resource exhaustion
  – prob: attacker could flood all relay ports to prevent calls from succeeding
  – sol: Restricted Latching
    i.e. assert Signalling.IP == RTP.IP

• Eavesdropping
  – prob: attacked floods in the hope of being latched upon
  – sol: restricted latching
    • prob: attacker spoofs IP or shares NAT with UA
    • sol: use SRTP
Question

Interest in adopting this as a WG document?
