# Changes from -01

- Text has been revised to avoid terminology issues with related specs (mainly RFC3963 , RFC5213)
- Explicit subsection to deal with deletion of the delegated prefix
- Added text to Security Considerations section
- Editorial fixes and improvements

# Next steps

- Volunteer reviews and mailing list feedbacks were made to the draft -01 version since IETF 82. Those comments were incorporated into -02 version.
- Progress toward Working Group Last Call.
