# NAT

- draft-ietf-tsvwg-natsupp-02.txt
- Addresses all reported issues.
- Improves Socket API and IANA sections.
- Current structure based on problems solved.
- Would a structure based on Messages/  
Procedures be better?
- Comments welcome!

# SCTP over UDP

- draft-ietf-tsvwg-sctp-udp-encaps-03.txt
- Last two revision incorporated comments from the list and editorial changes.
- Implemented in FreeBSD and Mac OS X NKE.
- Ready for WG LC.
