

# draft-saintandre-precis-nickname-00

- A simple usage of FreeClass for chatroom nicknames
- Normative dependency from draft-ietf-simple-chat, which is ready for submission to the IESG
- Probably will also be used in XMPP
- PRECIS WG seems to be the right place to work on this document because i18n expertise is here
- Would the PRECIS WG consider taking this I-D on as a working group item?
