XMPP Address Format
(draft-ietf-xmpp-6122bis-02)

Peter Saint-Andre
XMPP WG
IETF 84, Vancouver

1

Changes from -00

- Solidified change of NFKC to NFC (speak up now if you object!)

- Changed SHOULD to MUST regarding conversion of A-labels to U-labels

- Specified enforcement rules for servers and clients (i.e., servers enforce where possible)

Remaining Work

- Processing order: perform normalization first (as in IDNA2008)?

- Map full-width and half-width code points to their decomposition mappings?

- Error handling: add a sentence about using <jid-malformed/> (might go in 6120bis)

- Wait for PRECIS framework to be done
