draft-terriberry-avp-codecs-00

Timothy B. Terriberry

Goal

- Update the AVP profile to remove the SHOULD for DVI4
  - Since SAVP, AVPF, and SAVPF include AVP by reference, this update applies to those profiles as well

- How many people have read this draft?

Updates to RFC 3551

- "The text of [RFC3551] is hereby updated as set forth below."

  - "In the final paragraph of Section 6, replace 'payload types 0 (PCMU) and 5 (DVI4),' with 'payload type 0 (PCMU).' Also, add a final sentence to this paragraph that states, 'Some environments may make support for PCMU mandatory.'"

- Now everybody has

- Should we advance this draft?
