CLUE WG
IETF-85

Mary Barnes (WG co-chair)
Paul Kyzivat (WG co-chair)

Day 2 - Tuesday, Nov 6, 2012

Note Well

- **Any submission to the IETF intended by the Contributor for publication as all or part of an IETF Internet-Draft or RFC and any statement made within the context of an IETF activity is considered an "IETF Contribution". Such statements include oral statements in IETF sessions, as well as written and electronic communications made at any time or place, which are addressed to:**
  - **the IETF plenary session,**
  - **any IETF working group or portion thereof,**
  - **the IESG or any member thereof on behalf of the IESG,**
  - **the IAB or any member thereof on behalf of the IAB,**
  - **any IETF mailing list, including the IETF list itself,**
  - **any working group or design team list,**
  - **or any other list functioning under IETF auspices,**
  - **the RFC Editor or the Internet-Drafts function**
- **All IETF Contributions are subject to the rules of RFC 5378 and RFC 3979 (updated by RFC 4879). Statements made outside of an IETF session, mailing list or other function, that are clearly not intended to be input to an IETF activity, group or function, are not IETF Contributions in the context of this notice. Please consult RFC 5378 and RFC 3979 for details.**
- **A participant in any IETF activity is deemed to accept all IETF rules of process, as documented in Best Current Practices RFCs and IESG Statements.**
- **A participant in any IETF activity acknowledges that written, audio and video records of meetings may be made and may be available to the public.**

Agenda - Tuesday (13:00-15:00)

- 13:00-13:10 Agenda bash(Chairs)
- 13:10-13:30 FW: Media capture/content attribute (Issue #10) (Roni)
- 13:30-14:00 Call Flow: using ladder diagram in draft-kyzivat-clue-telemedical-callflow-01 (Paul)
- 14:00-14:30 Proposed FW reorg, new milestones, volunteers to work on and review docs (chairs)
- 14:30-14:50 Issue Review – as time allows (Chairs)
- 14:50-15:00 Plans going forward (chairs)

Way Forward

1. Agree revised WG deliverables and document structure

2. Agree documents to use as starting points for WG deliverables

3. Get Volunteers to serve as document authors/editors and contributors for the WG deliverables. (Note: we can use a lot of material from existing individual documents as starting points for docs for WG deliverables)

Overview

Proposed Deliverables

- Framework

- Data model

- Signaling:
  - CLUE & SDP
  - RTP mapping and usage

- Call Flows

Framework

- Already agreed WG document comprises aspects of framework, along with identifying data elements and messaging model, with examples.

- Suggestion to split some material that relates to other (proposed) deliverables into separate documents.

- Suggestion to add some higher level material to introduce some of the concepts and to provide an "orchestration" of the other proposed deliverables.

Proposal for Framework Restructure

- Add a new section after section 4 including some of the higher level concepts that are embedded later in the document.

- A lot of that material can be derived from earlier drafts and in particular WG presentations (and tutorial) – i.e., lots of really good visual information.

- Need to figure out what material is appropriate to be moved to relevant documents for other deliverables.

NOT suggesting to start from scratch

I E T F

Proposal for Framework Restructure

- Options for revising framework to be more high level, leaving more details in other documents:

- Option 1:
  - Leave existing material as is – as other documents are developed, that information as appropriate can be copied.
  - Once we have WG documents for other deliverables agreed, we can revise the framework for consistency and remove duplicate material.

Option 2:
  - Refactor now.
  - Seed other proposed documents with the relevant material.

I E T F

Other Proposed deliverables starting points

- RTP mapping and Usage:
  - Agree draft-even-clue-rtp-mapping-04.txt as baseline for WG document
  - Pull requirements and other relevant material from draft-lennox-clue-rtp-usage-04
- Data model:
  - Use draft-presta-clue-data-model-schema-01 as a baseline, incorporating textual descriptions from draft-romanow-clue-data-model-01
  - Pull relevant material from framework

Other Proposed deliverables starting points

- ## Signaling (CLUE & SDP):
  - Need to figure starting point considering:
    - draft-even-clue-sdp-clue-relation-01.txt
    - draft-romanow-clue-call-flow-02
- ## Call Flows
  - Several documents have material around this:
    - draft-romanow-clue-call-flow-02
    - draft-kyzivat-clue-telemedical-callflow-01
  - Likely we should start a new doc that reflects WG consensus and working concepts based on other revised docs

I E T F

Assignments

- Framework: Existing doc authors/editor + 1

- Data model: Simon, Roberta +1

- Signaling:
  - CLUE & SDP: Roni, Rob, Simon, Roberta
  - RTP mapping and usage: Roni, Jonathan, +1

- Call Flows: Simon, Roberta, Rob, Roni, +1

I E T F

Proposed Revised WG deliverables

- May 2013 Use Case document (Informational)
- May 2013 Requirements document (Informational)
- May 2013 Framework (Standards Track)
- Oct 2013   Data Model document (Standards Track)
- Oct 2013 CLUE and SDP Signaling (Standards Track)
- Oct 2013 RTP Mapping (Standards Track)
- Oct 2013 Call Flows (Informational)

Plans going Forward

- Weekly design team calls to continue
  - Topic to be announced by Friday noon Pacific.
- Virtual interim meeting in mid-December
- Virtual (or F2f interim) in late January/early February 2013.
- MUST have more engagement on mailing list.
