

# **draft-deng-mif-api-session-continuity-guide-03**

Hui Deng, Suresh Krishnan, Ted Lemon, Margaret Wasserman

# Changes from Vancouver

- Addressed comments from Brian Carpenter and Pierrick Seite on the previous version (Thanks!!)
- Changed the algorithm to avoid a potential race condition

# Changes (2)

- Added text to check for reachability
- Added text about policy for interface selection preference being out of scope
- Added text about other continuity mechanisms (L3 and L4) that keep IPv6 addresses stable

# Next steps

- Is this work interesting/useful?
- Is it ready to adopt as WG item?
