A YANG Data Data Model for Routing Management

draft-ietf-netmod-routing-cfg-09

Ladislav Lhotka
\langle lhotka@nic.cz \rangle

12 March 2013
Changes since IETF 85

Very few changes overall.

- Title has changed: “Configuration” was replaced with “Management”.
- Types have been adapted to 6021bis (yang:dotted-quad).
- New typedefs routing-table-ref and route-filter-ref.
- Several mistakes in XPath expressions were corrected.
- Text clarifications.
Status

There are no open issues.

This I-D is now coupled with RFC6021bis, so both documents has to be advanced together.
