NAI, Exten, DTLS
RADEXT - IETF 86
NAI

- Updates from Jim Schaad and Bernard Aboba
- The NAI is for identifying users anywhere
- not just RADIUS and Diameter
- The hope is most authentication protocols will use it
- Notes on transport in other protocols
Exten

- Many minor updates from IESG, appdir, gen-art reviews
- Cleanups, consistency, ambiguities
DTLS

- Session resumptions as per 5077
- References to 6520
- Cleanups and checks against 6615 (R / TLS)
Discussion?
