Mapping of Address and Port (MAP) - Deployment Considerations

draft-ietf-softwire-map-deployment-01

Q. Sun (Presenter), M. Chen, G. Chen, C. Sun, T. Tsou, S. Perreault
IETF 86, Orlando, March. 2013
Received comments since -00

- Received comments in Atlanta meeting
  - Cover MAP-E, MAP-T and 4rd-u
  - MAP-E, MAP-T and 4rd-u should be in normative reference
- Received comments in the ML
  - PSID consideration
  - Hairpinning
Updates from -00

- Add 4rd-u consideration in section 4.2.7.
- Move the differences between MAP-E, MAP-T and 4rd-u into one section, so almost all the other parts of the document can be applied to MAP-E, MAP-T and 4rd-u.
- Split references to Normative and Informative.
- Modify the PSID consideration part.
- Add hairpinning consideration in section 4.3.
- Update some references which have become RFC or WG item.
- Editorial changes and cleaning
Open issue

• Received suggestion to use "IPv4 Residual Deployment" to refer to all of MAP-E, MAP-T, and 4rd-U.
