AQM – Active Queue Management and Packet Scheduling

Date: Tuesday, 30. July 2013

Time: 17:00 – 18:30 CEST

Room: Potsdam 1

Chairs: Wesley Eddy

Richard Scheffenegger

Description:

The Active Queue Management and Packet Scheduling working group (AQM) works on algorithms for reactively managing queues in order to minimize standing queues, help control the sending rates without undue losses, minimize delays for interactive apps, and protect flows from misbehaving flows.
