

Some Thoughts on an I2RS Protocol

Edward Crabbe

As An Operator:

Why Are We Interested in This?

- Functionality
- Simplicity
- Extensibility and Speed of Development
- Deployability Across Diverse Systems

Component Protocols Involved

- Functionality
- ~~Simplicity~~
- ~~Extensibility and Speed of Development~~
- ~~Deployability Across Diverse Systems~~

As A Chair:

Operator Feedback

This is a crucial part of this (and any) IETF process. We don't want to produce something that's going straight to the protocol graveyard.

Please speak up.

Experiments Going on in Private

- People are, in private, experimenting with extensions to existing protocols
- Several of these are quite promising.
- Despite the results pushing the bounds of charter, I feel these should be shared ASAP if for no other reason than to avoid a preventable gap in knowledge within the wg
