

# Information Elements for Data Link Layer Monitoring

<draft-ietf-ipfix-data-link-layer-monitoring-03>

Shingo Kashima (NTT)  
Atsushi Kobayashi (NTT East)  
Paul Aitken (Cisco Systems)

# Background

- ❖ Submitted as WG draft version 03 in July 2013.
  - Improved the description about Edge Relay including Virtual Edge Bridge (VEB) and Virtual Edge Port Aggregator (VEPA) in sub-section 2.2.
  - Removed the following IEs, because it is not essential for the link layer traffic monitoring.
    - dot1qTagProtocolIdentification
    - dot1brEChannelTag
    - dot1brEChannelPriority
- ❖ Waiting for feedback from Pat Thaler.

# Next Step

- ❖ Ready to submit it after the feedback from Pat Thaler and any Ethernet experts.
