A usage/applicability draft about EVPN

- Due to the complexity of EVPN, a usage draft was suggested during IETF-86 to help understand the technology better
- EVPN procedures are explained over a simple deployment scenario
 - Comparing different options
 - Analyzing benefits and trade-offs of each option
- Along with EVPN, this document provides a simplified guide for the deployment of EVPN in IP/MPLS networks

Next steps

- Feedback needed and appreciated
- Help us make it useful
