

802.1aq Support over EVPN

draft-allan-l2vpn-spbm-evpn-04

Dave Allan, Jeff Tantsura, Don
Fedyk, Ali Sajassi

Changes from Last Version

- Alignment with EVPN-PBB
- 802.1Qbp support punted to a future document
 - 802.1aq is “done and dusted”, no hanging references
 - 802.1Qbp currently introduces a number of interworking possibilities due to backwards compatibility provisions
- Outstanding technical issues resolved
 - Configuration of ESI values

Next Steps

- Document is very close to being technically complete
- Request WG adoption
