Multicast Fast Handover

draft-ietf-multimob-fmipv6-pfmipv6-multicast-01

Thomas C. Schmidt, Matthias Wählisch, Rajeev Koodli,
Gorry Fairhurst, and Dapeng Liu

Rational

o Multicast fast handover between MAGs/ARs

o Supplement multicast capabilities to RFCs 5568 and 5949 by engineering appropriate mobility options for multicast context transfer

o Define protocol operations that optimize multicast handover performance w.r.t. unicast compliance

Current Status & Work

o Editorial polishing among authors in progress

- Shiny version delayed by some weeks ☹

o Content of Specs complete since a long time

- Lengthy discussions, feedback, reviews in '11, '12

- Feedback desired while finalizing

o Ready for WGLC
