RFC Style Guide

• Progress since IETF 87 includes
  – Continue to establish guidelines for citations (e.g., IEEE vs Institute of Electrical and Electronics Engineers)
  – Focus on areas that will need to be modified with format changes (e.g., changes to author names and indexing)
  – Clearly defining "most stable reference"
  – Revise requirements and recommendations in Authors’ Addresses section
  – Remove guidance on Headers and Boilerplates that is already covered in RFC 5741
RFC Format

• Process since Berlin
  – Design Team active and engaged
  – IAB's i18n program providing input on non-ASCII requirements for series
  – Discussion with IESG about normative vs informative text, images, and accessibility
