

SIMULCAST SIGNALING

[draft-westerlund-avtcore-rtp-simulcast-03](#)

Bo Burman (Ericsson),
Suhas Nandakumar (Cisco)
Magnus Westerlund (Ericsson)

OVERVIEW

- › IPR Disclosures
- › What is Simulcast
- › Design Goals
- › Solution Overview
 - Walk through of Unified example
 - Brief look on Multiple Transport
- › Going Forward

IPR Disclosures

- › Telefonaktiebolaget LM Ericsson (publ)'s has made a Statement about IPR related to this draft in <https://datatracker.ietf.org/ipr/1592/>
- › Microsoft Corporation has made a statement about IPR related to this draft in <https://datatracker.ietf.org/ipr/2157/>

A Target Scenario

Active speaker

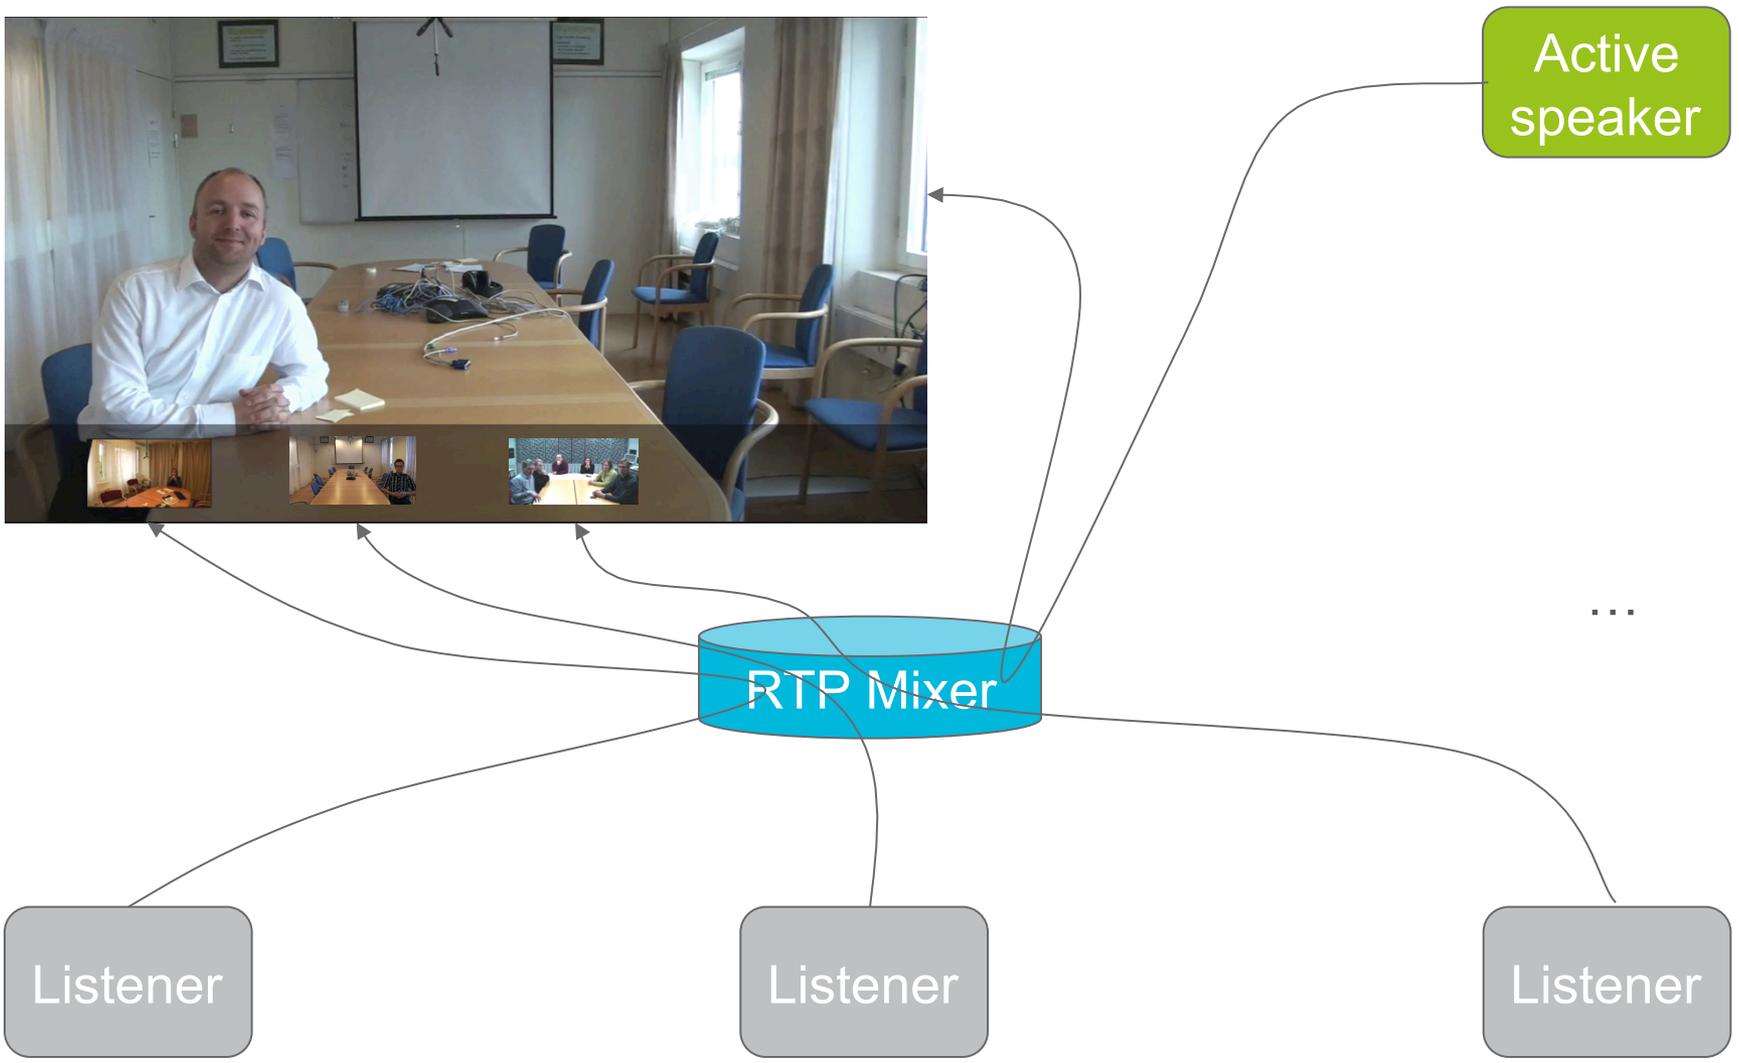

RTP Mixer

Listener

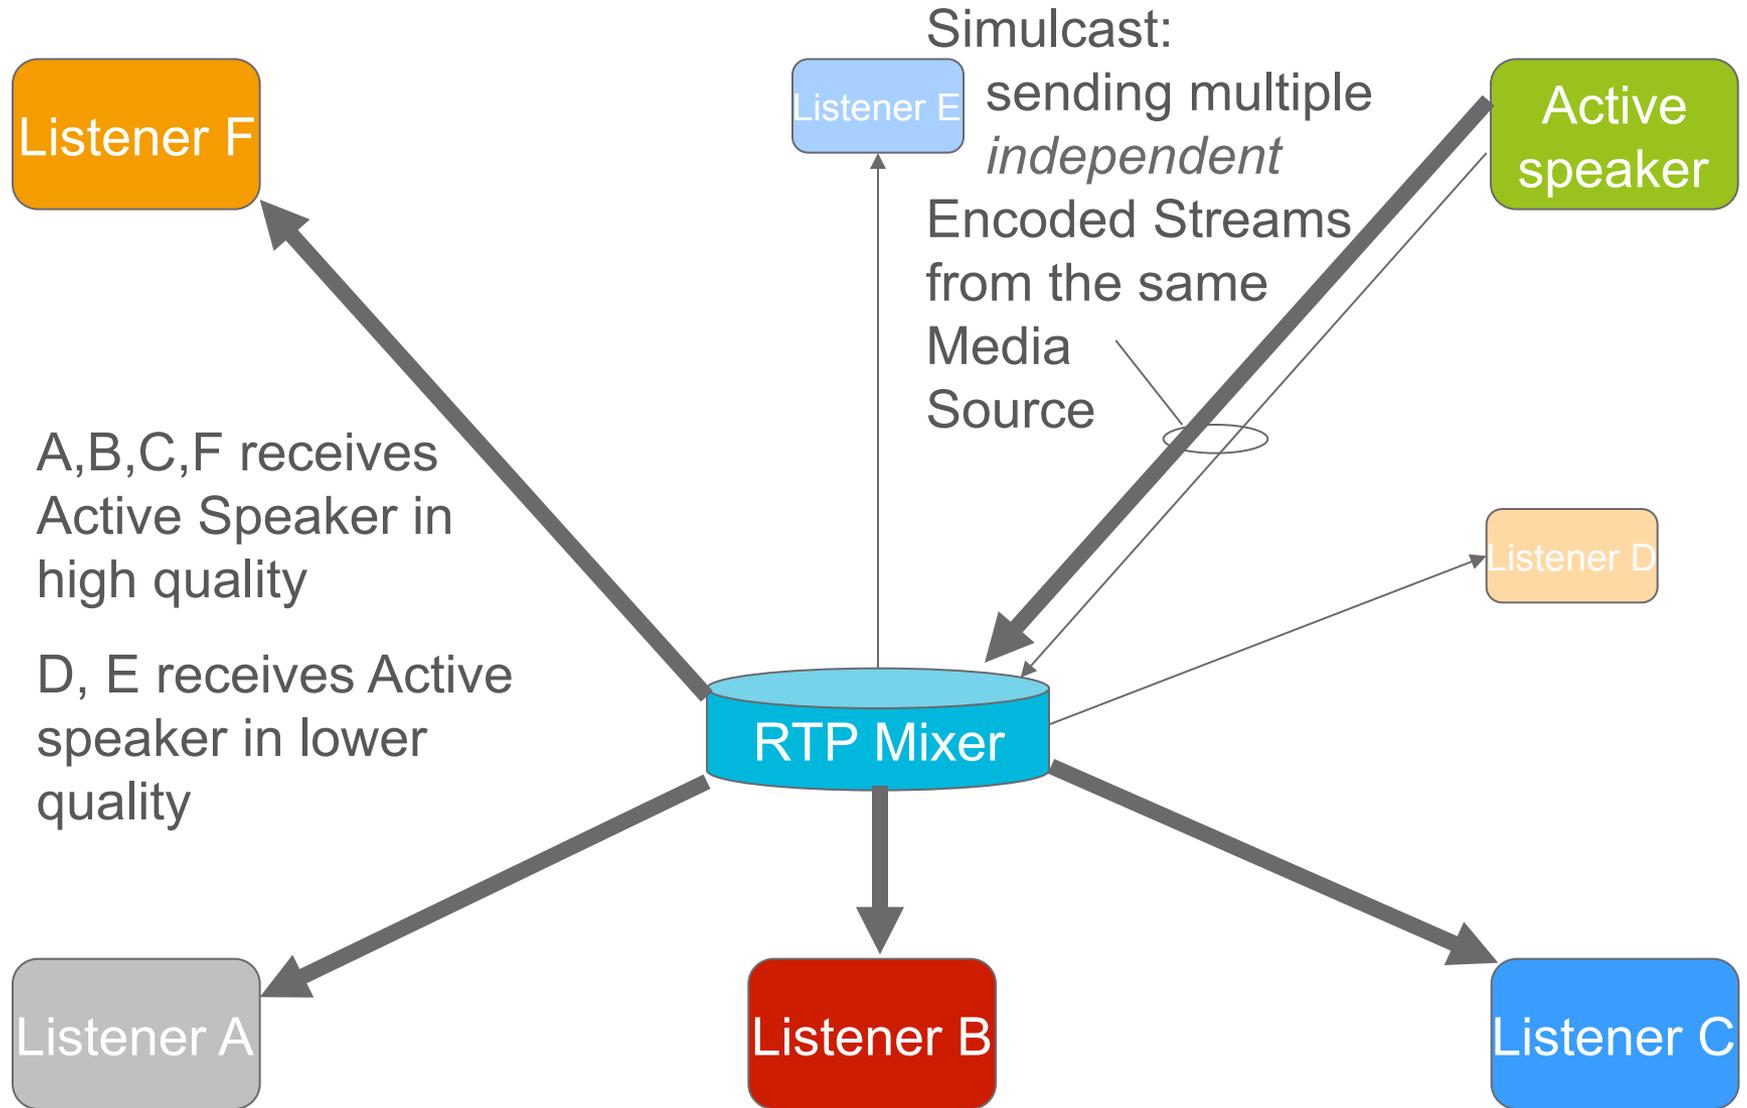

Listener

Listener

...

Simulcast

DESIGN GOALS

- › Enable negotiation of simulcast per direction
- › Determine each peer's capabilities and preferences for Simulcast dimensions
 - Video Resolution
 - Frame-rate
 - Codec
 - Bit-rate variations
 - Extensible
- › Arrive at media codec configurations to use
 - Including number of Encoded Streams
- › Usable in both
 - Unified, i.e. all Encoded Streams per Media Source (m=)
 - Across multiple m= lines
- › Negotiate simulcast support but keep particular Encoded Stream inactive
 - Re-enable on request
- › Establish boundaries for Encoded Streams using regular SDP media description mechanisms
- › Enabling association between Source Packet Streams, Media Source and Encoded Streams

SOLUTION BASICS

SIMULCAST RECEIVER OFFER UNIFIED PLAN

RELATED PROPOSALS

- › Relying on SRCNAME to make RTP side work:
 - [draft-westerlund-avtext-rtcp-sdes-srcname-03](#)
 - Provides ID/Relation for each received SSRCs
 - › Media Source (Scoped by CNAME)
 - › Particular Encoding Configuration
 - › Example: 1.B
 - Ensures that receiver knows which media source it contains
 - Ensures that receiver knows which representation it is
 - › Separate between multiple received configurations

RELATED PROPOSALS

- › RTP Header Extension for SDES items
 - [draft-westerlund-avtext-sdes-hdr-ext-01](#)
 - For new SSRCs or new Session Participants
 - › Speed up delivery, by including from first/early packets received
 - › Fate sharing with Media by being in RTP header
 - Enables both SRCNAME and CNAME to be timely delivered
 - Optional improvement
- › Was Discussed in AVTEXT on Tuesday
 - Discussion will continue on mailing list

GOING FORWARD

- › Simulcast in WebRTC has significant interest
- › Core of WebRTC will try to finish up next year
- › To ensure WebRTC and SIP/SDP Interoperability
 - Need to develop solution that works and interoperate
 - Provide it in a timely fashion
- › Is this good enough starting point for WG Item?
