draft-ietf-radext-dynamic-discovery-08
Document status

- -08 submitted a week before cutoff
- resolved all open issues (tracker & ML)
- no further comments for -08 since

- another WGLC needed?
- or proceed towards publication?
Category: EXP vs STD?

- Document is planned to become EXP.
- Can't help but contemplate that:
  - RADIUS discovery document is much more thorough than Diameter equivalent.
  - RADIUS mechanisms in public use, Diameter ones 'probably'?
  - And yet, Diameter discovery is standards-track, while RADIUS is only experimental.
- Okay like that?
