

# IETF 88 pim wg status

# pim WG status

- IGMP/MLD explicit tracking draft in IETF last call
- RFC 4601 (PIM-SM) implementation report in RFC editors queue
  - This is being used to advance 4601 to Internet Standard. 4601bis may be ready for WGLC. Addresses a significant amount of 4601 errata
- 3 other active WG drafts
  - Explicit RPF vector, DR load-balancing, hierarchical join attributes, and IGMP/MLD in Wireless and mobile networks
- The above and 6 other drafts will be discussed in the pim meeting Friday
