

draft-yong-tsvwg-gre-in-udp-encap-02

Edward Crabbe

Minimal Changes twixt 01 & 02

- Appropriate imperative capitalizations
- “In an instance where the UDP src port is not set based et the flow invariant fields from the payload header, a random port SHOULD be selected in order to minimize the vulnerability to off-path attacks. [RFC6056] How the src port randomization occurs is outside scope of this document.”

Requesting

- Further comments and discussion
- WG adoption
