-data-only

BRIAN ROSEN, NEUSTAR

Summary

- Defines a way to carry a Common Alerting Profile message in a SIP MESSAGE
- Used with Additional Data for data-only "call"
- New version
  - Clarifies that data only is just like INVITE but with MESSAGE and no media. Everything else is the same
  - Adds text about call backs (there aren't any)
  - Adds text on how to use an external server to avoid needing a server on the device

What to do?

- Christer wants to add the INFO package to this
  - I am not a fan, but if that's the way to make progress, I'll live with it
- If we accept that idea, can we be done?
