draft-gellens-ecrit-ecall-03

IETF 89 ecrit WG — 5 March 2014
slides v1 — 17 February 2014

Purpose of draft

- Describe IETF mechanisms to enable next generation (all-IP) pan-European eCall

- eCall is a standardized vehicle emergency call system providing voice and vehicle data (called Minimum Set of Data or MSD) mandated in the European Union

Draft Status

- Draft was split off from draft-rosen-ecrit-ecall (which had 11 versions)

- This draft is specifically for pan-European eCall

- Fourth revision since split

Need for Draft

- Describes how the pan-European eCall service can be supported using IETF standards (adhering to European Commission requirements and regulations)

- Needed by ETSI/3GPP eCall work

4

Proposal

- ECRIT adopt draft as WG draft
