

Extension Registry Specification for draft-ietf-eppeext-reg

Scott A. Hollenbeck

shollenbeck@verisign.com

EPPEXT@IETF-89

Background

- “Guidelines for Writing an IANA Considerations Section in RFCs”
 - RFC 5226, BCP 26
 - Describes practice for registry creation and management
- We need to provide instructions for:
 - Registry creation
 - Addition of new entries

Current Proposal for Entries

- “Specification Required” per RFC 5226
- Which means...
 - Permanent and readily available public specification
 - Not necessarily an RFC
 - Implied use of Designated Expert
 - See Section 3 of RFC 5226

Question for Discussion

- Is “Specification Required” correct?
- Alternatives:

Private Use	Specification Required
Experimental Use	RFC Required
Hierarchical Allocation	IETF Review
First Come First Served	Standards Action
Expert Review	IESG Approval
