UNCERTAINTY

GEOPRIV
IETF 89

STATUS

- Draft submitted

- Unholy union of …-uncertainty and …-confidence

- New applicability statement

APPLICABILITY STATEMENT

- This document makes a simplifying assumption that the Target of the PIDF-LO occupies just a single point in space. […]

- To a large extent, whether this simplification is valid depends on the size of the target relative to the size of the uncertainty region. […]

- This assumption is less useful as the Target of the PIDF-LO becomes large relative to the uncertainty region. […]
