

NETCONF over TLS

Jürgen Schönwälder

j.schoenwaelder@jacobs-university.de

draft-ietf-netconf-rfc5539bis-05

Changes since IETF 88

- In response to the port number discussion, added a new section 2.1.3 explaining more clearly the port number usage
- Moved all YANG definitions to draft-kwatsen-netconf-server-01
- The document now has 10 pages instead of 24 (excluding the change log appendix)
