draft-ietf-pcp-anycast-01

- Changes since -00
 - Shortened discussion of asymmetric routing scenarios:
3. Deployment Considerations
There are known limitations when there is more than one PCP server and asymmetric routing, or similar scenarios. Mechanisms to deal with those situations, such as state synchronization between PCP servers, are beyond the scope of this document.
- Open issue
 - Appendices A&B: Lengthy discussion on alternative discovery methods for PCP and history of IP anycast
→ Keep? Drop? Revise?
- Next step
 - WGLC?
