

Update to LDP extensions for Explicit Pseudowire to transport LSP mapping

draft-ietf-pwe3-mpls-tp-pw-over-bidir-lsp-02.txt

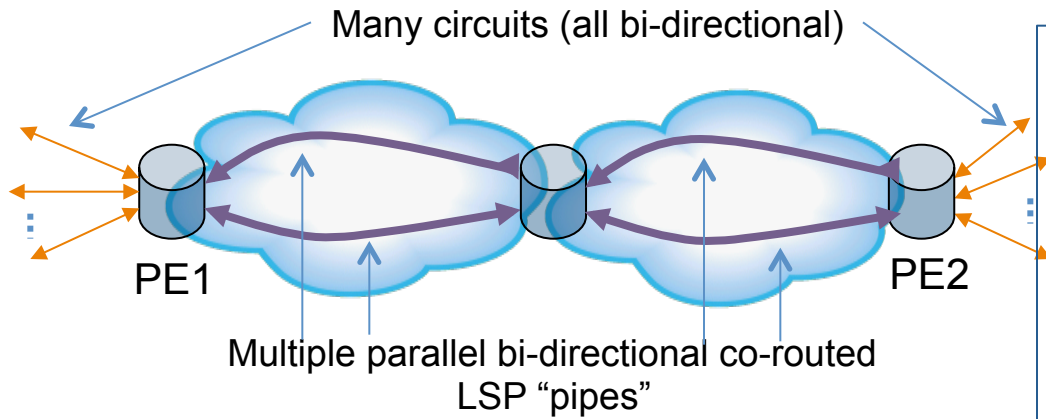

Mach Chen (mach.chen@huawei.com)

Wei Cao (wayne.caowei@huawei.com)

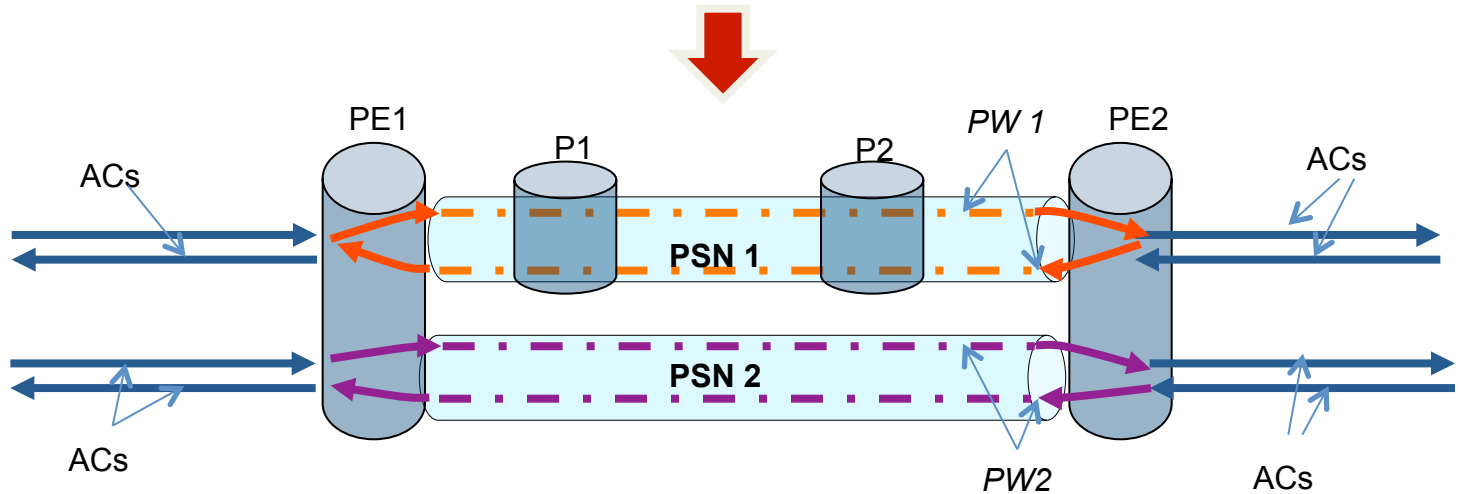

Attila Takacs (Attila.Takacs@ericsson.com)

Ping Pan (ppan@infinera.com)

Motivation and Solution Overview

- It's desirable to aggregate user circuits into the same "pipes"
 - Easy to manage (e.g. protection)
 - Predictable service qualities (e.g. delay)

Updates Since Last Version

- Resolve Gregory Mirsky's comments
 - To eliminate confusion, changed “Congruent Mode” to “Co-routed Mode”
 - Added a new status code
 - The C-bit and S-bit cannot be both set
- Editorial changes

Next steps

- Solicit more review and comments
- The draft is stable and is ready for WG Last Call.
