

draft-byrne-v6ops-clatip-01

Status

- Presented 00 in Vancouver
 - Feedback
 1. Make the solution more general
 2. Seems folks understand the need for this type of reserved IPv4 address in the general case
- Updated to 01
 - **“DS-Lite [RFC6333] directs IANA to reserve 192.0.0.0/29 for the B4 element. This memo generalizes that IANA reservation to include other cases”**
 - 464XLAT is listed as an example case only

Next Step

- WG adoption?
