Jiangang Tong (tongjg@sttri.com.cn)
Roni Even(roni.even.tlv@gmail.com)
Qin Wu (bill.wu@huawei.com)
Rachel Huang (rachel.huang@huawei.com)

Document Status

- What is this draft about?
  - Supports reporting information on MPEG2 TS PSI related Decodability Statistics parameters
  - Complementary to MPEG TS PSI Independent Decodability Statistics carried in XR Block defined in RFC6990.

- Where are we about this draft?
  - draft-bi-xrblock-rtcp-xr-psi-dep-decodability first presented In IETF 87 Berlin meeting,
  - v (-00) of draft-ietf-xrblock-rtcp-xr-psi-decodability discussed and adopted in IETF88 Vancouver meeting

- The latest update is v(-01), changes compared to previous v (-00).
  - Change field size from 32 bits into 16 bits based on Colin's comment

    - Adapt undefined/over-range value 0xffff to 16 bit field size.
    - overflowing a 16 bit field is unlikely for most of time based metrics
