

IETF 90 – opsawg meeting
Toronto, 23 Jul 2014 (remote)

draft-winter-opsawg-eap-metadata

Status of draft

- -00 is still current version ; -01 in the works
- Will move towards YANG data model
- (auto-converted) XML « on the wire » remains mandatory-to-support
- Differences between schemas in -00 vs. -01
 - Our (unreleased) software so far expects -00 XML
 - Beta version will auto-detect and support both the -00 one and the -01 YANG-based XML
 - Final version only YANG-based XML
- Expect -01 draft well before IETF91
