

Considerations for Selecting RTCP Extended Report (XR) Metrics for the RTCWEB Statistics API

V. Singh, R.Huang, R. Even, D. Romascanu, L. Deng

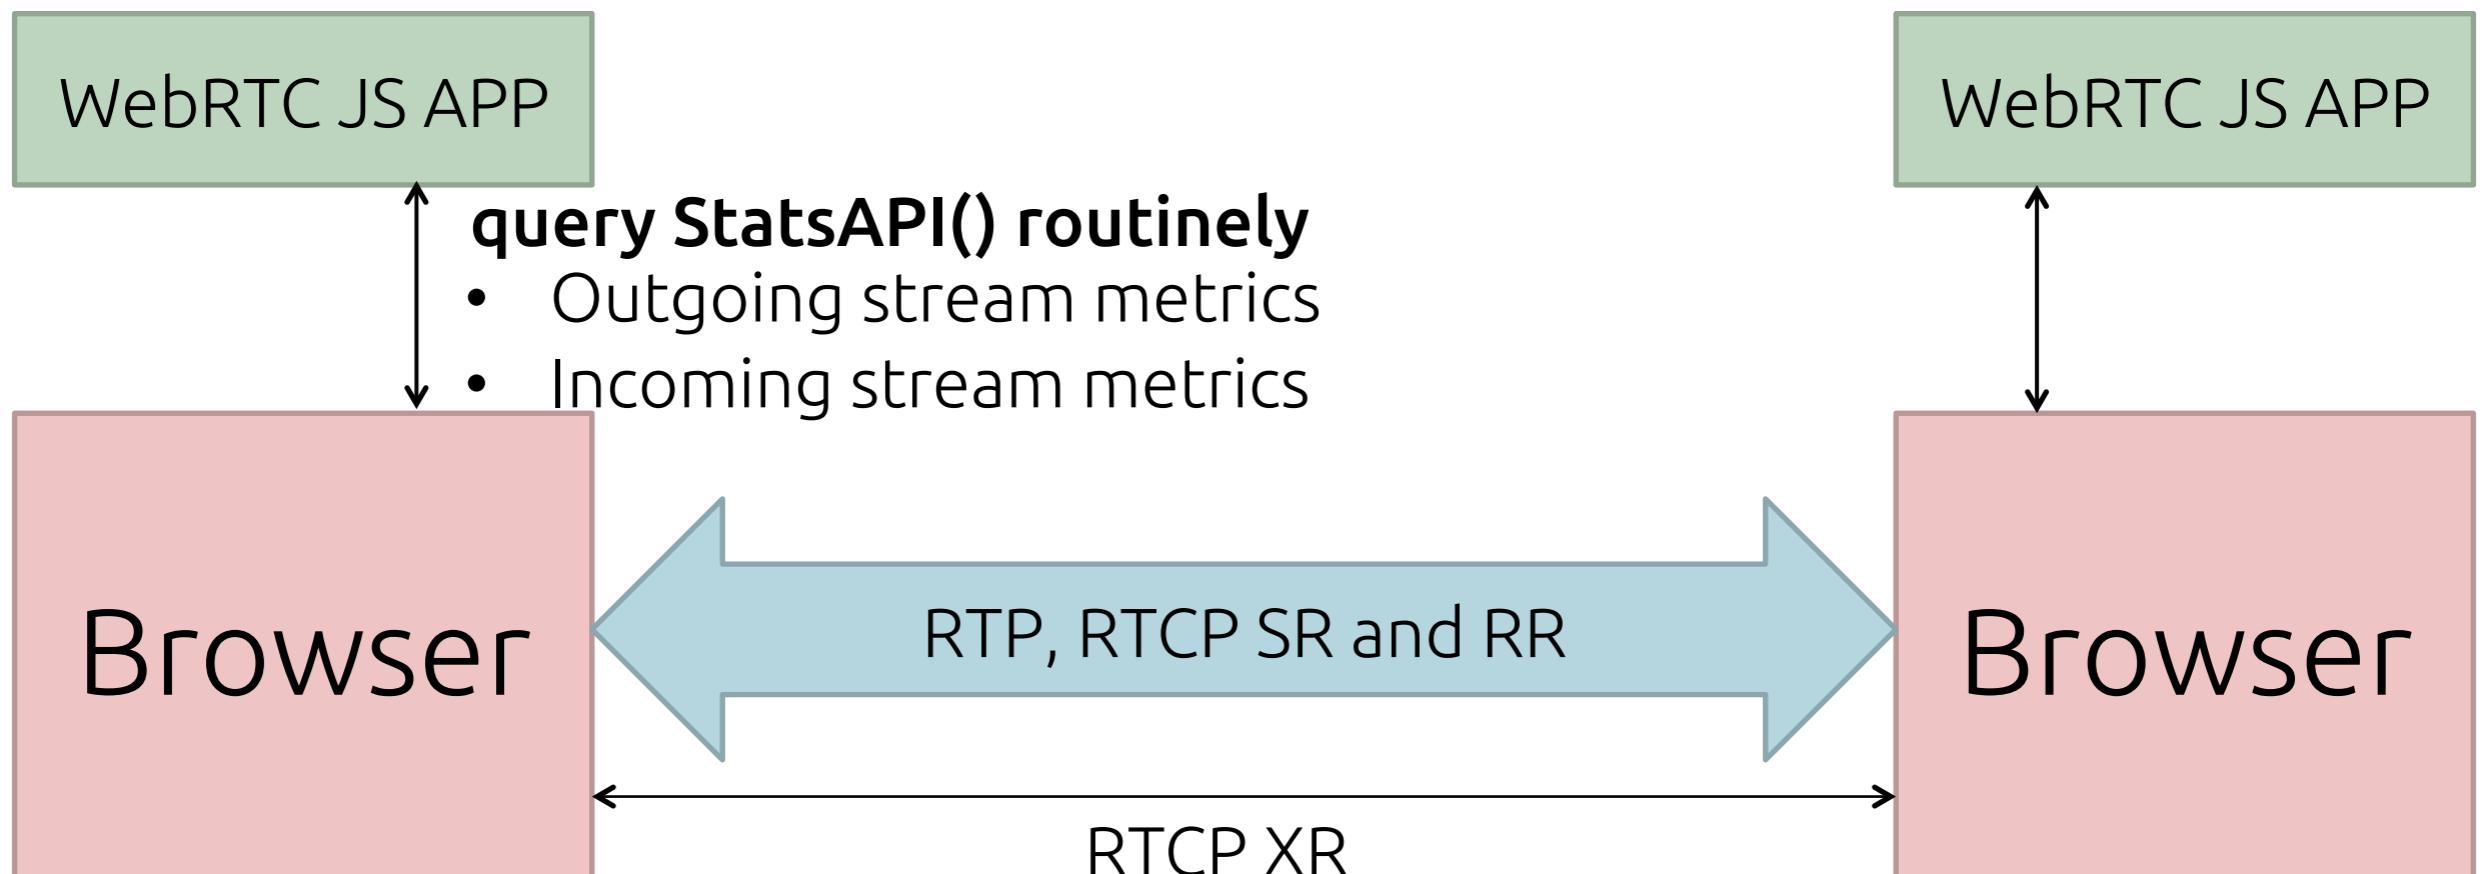

Toronto, IETF90

<http://tools.ietf.org/html/draft-huang-xrblock-rtcweb-rtcp-xr-metrics-03>

Changes in -04

- Explained the interaction of the JS API and RTCP Extended Reports (XRs).
- Removed ECN metrics
- Merged additional-stats (section 6)

Architecture

Browsers independently measure metrics for the **outgoing** and **incoming** streams

List of proposed metrics

- Packets and octets Discarded
- Cumulative number of packets repaired
- Burst packet loss and discarded
- Frame impairment metrics
