# NOMCOM 2014 status

46 confirmed candidates for 14 positions
NOMCOM will not fill App Area position,
But we collected candidates … just in case
13 phone conferences
6 breakfast meetings (so far)
1 remote interview, another Thursday

NOMCOM likes dogfood: JITSI for interviews, some calls

OAUTH and OpenID integrates calendaring and polling

Ted Lemon <ted.lemon@nominum.com>

Delay Tolerant Networking

- NOMCOM has been using some of the early DTN protocols, and we have been having some problems...

- We have good end to end privacy and integrity.
  - We have increasing amounts of hop by hop privacy

- We have problems with congestion collapse, and a significant lack of reliable delivery.
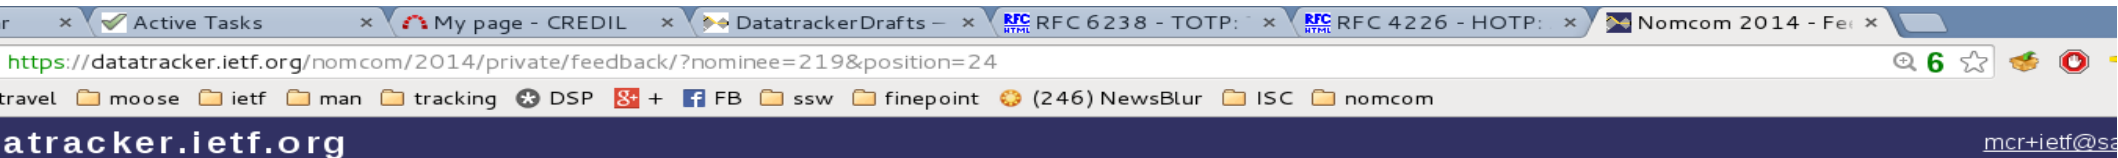

There have been some challenges

- Significant difficulty with getting some emails through.

- DMARC causing rejects from some NOMCOM members, back to candidates... who worry their email was not received.

- Some iCAL messages are just mysteriously eaten by mailman?

- Hard to debug without violating confidentiality!

Nomcom network architecture:SMTP

Random IETF
contributor

Deep packet inspection ("spam filter")
With highly congested link, and no TCP
