

Enumeration Reference Format

IETF 91

November 10, 2014

David Black

Adam Montville (remote)

Recent changes

- 07: Edits from AD Review, rewrite Abstract
- 08: Change to separate XML schema
 - Based on Toronto meeting discussion
 - Previous versions modified main IODEF schema
- 09: IANA Considerations (minor updates)
 - All fields in registry are required
 - “Version” = version of the referenced spec

Open Issues

1. AppsDir review suggestion/request – IANA-managed redirect URIs, e.g.:

http://www.iana.org/assignments/enumeration-reference-type/CXI_2.5

2. IODEFv1 – Update RFC 5070 to use this enumeration reference format?
 - Already used by IODEF v2 (5070-bis draft)
 - Method and Observable classes
